By the turn of the century, with the advent of Tango as a dance, people were watching people handling each other. Now they are watching themselves. The full evening dress has a curious resonance; so does lady dragon-fly leaving the magic lantern to dance solo Tango. The dance is doing a comeback. The movies and Broadway are reawakening people's need to handle each other: The old, the young, the rich, the undernourished all revolve into the spotlight of a ballroom, adopting mating postures in public. In a way, for my teacher all that would have meant a success story. But he could not savor it. His point was to go on being retentive, and that's how he died, terrified by his own abundance. His was a very frail body in a bigger than life soul, which in those days fitted the generalized cliché of the poet.

My teacher died a long time ago in Buenos Aires. He was thirty five years old, and a very vulnerable man.

-And now that you know that it doesn't take two to Tango, let's try.

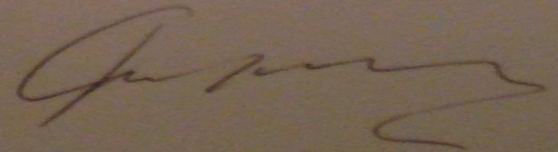

-I want you to go on. Why stop?

-So we can practice, I said with much hesitation.

-Tango?

-Right, I said ... But she was already drawing.

Pedro Cuperman, 1991

The first part of the text is a dense block of small, illegible text, likely bleed-through from the reverse side of the page. It appears to be a standard paragraph of prose.

The second page contains several paragraphs of text, also appearing to be bleed-through. The text is too small to read but is organized into distinct blocks.

The third page features a central paragraph of text, with some lines appearing slightly more prominent than others, possibly due to the scanning process or the original document's layout.

The fifth page contains text, including a prominent signature or name at the bottom right. The text is mostly illegible due to its small size, but the signature is clearly visible and appears to be a stylized name.

The choices went from solo dance to mandance to finally the ballroom (otherwise you needed the Academy—to be there paying money while others look at you with condescension). But there is little doubt about solo dance, this Universal of all beginnings. Finding yourself face to face with the *real* lady could incapacitate you, says my friend Carlos. Imagination is your door-handle. A delicious way of learning, you can not help liking those very ancient ways of not inflicting pain upon yourself. But this kind of unreality runs its own risks; it may not let you walk away from your own fire-filled self, from ecstasy uncommitted. Solo Tango, which for us was mostly un-reciprocated embrace, in my City described, after a certain point, somebody in care of solitude and groping for affection ... Woman's affection, never mind that we had never really seen a *real* one. Is that the reason why Neruda's absent minded woman (*Me gustas cuando callas porque éstas como ausente*) is so puzzling to American undergraduates ... Why?
